Portfolio: https://jasonbantzetan.com

## SKILLS

- Programming Languages: JavaScript, HTML, CSS, Python, Ruby, SQL, C#, Java
- Technologies & Frameworks: Ruby on Rails, React, Node.js, ASP.NET Core, Docker, AWS, PostgreSQL
- Languages: Chinese (Native), English (Professional), Malay (Advanced)

## EXPERIENCE

**Software Engineer** Mar 2025 - Current
*StrongMind* Chandler, Arizona

- Implemented 1EdTech OneRoster–compliant RESTful APIs to roster and index thousands of student records daily from an external SIS.
- Contributed to migrating Python-based AWS serverless pipelines to a centralized service to reduce cost, operational complexity, and data errors.
- Developed and maintained end-to-end features across a large Rails-based platform, delivering user-facing improvements.
- Implemented SAML IdP-initiated SSO and established integration testing using a headless browser.

**Software Engineer (Volunteer)** Sep 2024 - Current
*Accessifiers* Washington (Remote)

- Developed a branded learning management system using SASS and Python to reinforce brand identity.
- Developed a scalable LMS prototype on Azure with Docker and Tutor (Open edX).
- Mentored team members and project sponsor on LMS technologies through creating comprehensive documentation to facilitate knowledge transfer.

**Software Developer Intern** May 2022 – Dec 2024
*EIS Department, Brigham Young University – Hawaii* Laie, Hawaii

- Developed a real-time dashboard using React, ASP.NET Core, and MySQL to monitor external services with robust caching and minimum latency.
- Developed a REST API using ASP.NET Core and MySQL to automate test record management of 3000+ users quarterly and reduce manual processing time by 95%.
- Integrated SAML SSO with Quicklaunch IdP to replace cookie-based authentication to enhance web app security.
- Maintained 9 web applications using Agile practice through code reviews, bug fixes, and version control to improve code quality

**Web Developer Intern** Jun 2023 – Sep 2023
*FamilySearch* Lehi, Utah

- Developed a transliteration prototype using JavaScript and React to convert Romanized Filipino names into the ancient Baybayin script.
- Developed a prototype for dynamic rendering of PDF documents within web pages using React and FamilySearch in-house UI components.
- Implemented automated unit and integration testing and achieved 100% code coverage in unit testing using react-testing-library and jest.
- Collaborated with UX/UI designers to implement UI components and pages from Figma.

## EDUCATION

**Brigham Young University - Hawaii** Dec 2024
Bachelor of Science: Computer Science Laie, Hawaii

- CGPA 3.98
- Dean's list – University Honor Roll
